“ Campus Policy on Plastic Waste Management for Ecosystem Protection (SDG 15)”

Misamis University strengthens its implementation of **RA 9003**, the Ecological Solid Waste Management, through strict waste minimization, proper segregation, recycling, and measures to reduce plastic use across campus.

1. **Mandatory Waste Segregation.** Use color-coded bins: **Green** – Biodegradable, **Black** – Residual, **Blue/Yellow** – Recyclable. “No Segregation, No Disposal” is strictly enforced.
2. **Ban on Single-Use Plastics and Styrofoam.** Prohibited items include plastic straws, cups, cutlery, sachets, cellophane, and styrofoam containers. Using reusable or biodegradable alternatives is advised.
3. **Recycling and Composting.** Biodegradables are composted for the campus gardens and the MU established farm. Recyclables are processed through the MRF or sold to buy-back centers.
4. **Awareness Campaigns.** CEPA materials, orientations, and green campus initiatives will be conducted regularly.

All Colleges and departments are directed to ensure full compliance and promote plastic waste reduction in their respective offices.

For strict compliance.

SGD. KAREN BELINA F. DE LEON, M.D., Ed D.

President
